PARAFUSO FENDA MADEIRA CHATA LATÃO POLIDO

No ramo da construção civil são muito utilizados para fixação de caixilhos de portas e esquadrias, e janelas fabricadas em batedores de madeira, fixação de dobradiças e rodapés. Podem ser utilizados com buchas de nylon para fixação de objetos em paredes de concreto e alvenaria. O comprimento total deste parafuso inclui a cabeça.

REBITE REPUCHE ALUMÍNIO

O rebite também é conhecido como "rebite do tipo cego", pois é aplicado de forma rápida e simples em fixação de peças que tenham acesso apenas por um lado. Também é muito utilizado para unir peças de diferentes materiais.

20	-	-	5/8 (16,0)	Sext. Soberba 5/8 x 130

- OBS. 1)** Na escolha do parafuso verificamos que para cada tamanho de bucha, existe uma faixa de diâmetros de parafusos que podem ser utilizados. Para atingirmos a maior carga, utiliza-se o maior diâmetro do parafuso que a bucha admite. Para uma carga menor, pode-se utilizar o menor diâmetro.
- 2)** Para uma fixação correta utilizar sempre um parafuso de diâmetro dentro da faixa especificada na tabela acima. Quanto ao comprimento do parafuso, deve ser igual ao da bucha, acrescido do diâmetro do próprio parafuso e da espessura do objeto a ser fixado.
